**Beaufort County Hosts Site Visit and Open House for Okatie West Regional Stormwater Detention Project**

Stormwater design professionals, contractors, developers, property managers, and all stakeholders are invited to a site visit of the newly completed Okatie West Regional Stormwater Detention Project on Friday, July 27 from 1 p.m. to 4 p.m.

Attendees will learn about the current design techniques in detention and bacteria/nutrient removal. Representatives from Beaufort County, Ward Edwards Engineering (designer), R. B. Baker (contractor), and Environmental Conservation Solutions, LLC (best management practice supplier) will be on site to demonstrate the project design, provide guided tours and answer questions.

The project site is located off SC 170 in the Okatie area east of Sun City. The project entrance is located just north of the NHC HealthCare Bluffton entrance on the right traveling northbound. Follow the access road northeast to the project site. Those planning to attend should note that the access road is not paved, the terrain is rugged and parking is limited. This event will be held rain or shine.
